PORTFOLIO AND PROJECTS

Key Power BI / DWH / Analytics Projects

Below are the most significant projects reflecting my experience in developing BI solutions, data modeling, building DWHs and creating analytical dashboards.

Project 1: Corporate BI system for weekly board meetings

• Developed 15+ Power BI dashboards for monitoring KPIs, construction, and finance.
• Built a tabular model and showcases (Star Schema) for 120 KPIs.
• Implemented automated data refresh (stored procedures + M + SQL Agent).
• Result: reduced reporting time by 4 times.

Project 2: Building a New DWH (Data Vault → Star)

• Designed a logical and physical data model.
• Implemented a Data Vault layer and Star data marts for BI.
• Configured data quality control.
• Result: fully automated KPI calculations from the source system to the report.

Project 3: Self-service BI and user training

• Created corporate Power BI templates (json theme, pbit, rdl).
• Developed modeling and visualization guidelines.
• Conducted training for 30+ employees.
• Result: 5x increase in independent report development.
